PROFESSIONAL SUMMARY

Senior Software Engineer and team lead with 10+ years of experience building, improving, and maintaining web and mobile applications. Leads a team of 10 and brings strong experience in Ruby on Rails, API development, relational databases, production troubleshooting, performance optimization, and containerized deployment. Experienced in delivering complex communication-platform features, modernizing legacy Ruby applications, collaborating with stakeholders, and supporting engineering quality through code reviews, documentation, and team coordination. Focused on maintainability, reliability, and delivery quality.

TECHNICAL SKILLS

Languages: Ruby, JavaScript, TypeScript, Dart, Bash, HTML5, CSS3

Frameworks: Ruby on Rails, Sinatra, Node.js, NestJS, ReactJS, Flutter

Databases & Messaging: PostgreSQL, MySQL, MongoDB, DynamoDB, CouchDB, RabbitMQ

Cloud & Deployment: AWS (EC2, S3, Rekognition), Docker, Docker Compose, Kamal, multi-server deployments

Engineering: REST APIs, GraphQL, Microservices, RSpec, code review, performance tuning, legacy modernization

Tools & Ways of Working: Git, GitHub, GitLab, Bitbucket, Jira, Trello, Slack, Scrum, Kanban

PROFESSIONAL EXPERIENCE

Senior Software Engineer | November 2021 – Present

InAllMedia (client: Ooma)

- Lead a team of 10, coordinating engineering work and collaborating with teammates and stakeholders to deliver product improvements.
- Develop and enhance communications-platform features, including Shared Voicemail, Ring Groups, Call Queue, Messaging, and related capabilities.
- Modernize a legacy Ruby application by upgrading Ruby from 2.5.7 to 3.4.8, working through compatibility and dependency updates as part of the ongoing modernization effort.
- Improve application performance through caching, technology upgrades, and targeted optimizations; the previous resume reports a 20% performance improvement.
- Investigate technical bottlenecks and contribute to code quality, internal documentation, maintainability, and delivery improvements.

Software Engineer | January 2021 – November 2021

Leapfrog Technology

- Designed, built, and maintained reusable software for enterprise applications.
- Contributed to system improvements, software design patterns, and engineering best practices.
- Worked with customers and teammates to prioritize enhancements and resolve technical challenges.
- Participated in code reviews, system analysis, and process optimization.

Software Engineer | February 2019 – January 2021

Gurzu Inc. / Jyaasa Technologies

- Contributed to technical approaches and delivery for multiple enterprise applications.
- Designed and maintained scalable software systems and supported process improvements.
- Shared technical knowledge with teammates and mentored junior developers on code quality and good practices.

Android Developer | March 2018 – December 2019

Kathmandu University – Information and Language Processing Research Lab

- Designed and implemented features for research-based Android applications.
- Worked directly with customers to prioritize features and publish application updates to the Google Play Store.

Software Engineer (Freelance) | July 2017 – March 2021

Independent

- Designed and delivered software solutions in collaboration with clients, prioritizing requested features and delivery timelines.
- Built multiple mobile applications using Flutter.

Software Engineer | May 2016 – July 2017

Bajra Technologies

- Developed software using established design patterns and engineering standards.
- Identified and resolved technical issues to support smooth project execution.

EDUCATION

Bachelor of Science in Computer Science and Information Technology

Academia International College, Tribhuvan University | 2013 – 2018

AWARDS & ACHIEVEMENTS

- Winner, Hack-Ed 2020 – hackathon focused on enhancing education in Nepal, organized by Leapfrog Technology.
